INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY

International application No.

PCT/AU2005/000422

30	K No. I	Non-establishment of opinion with regard to novelty, inventive step and industrial applicability
Ι.	The c	questions whether the claimed invention appears to be novel, to involve an inventive step (to be non obvious), or to be trially applicable have not been examined in respect of:
		the entire international application
	X	claims Nos: 29
	beca	use:
		the said international application, or the said claims Nos. relate to the following subject matter which does not require an international preliminary examination (specify):
		the description, claims or drawings (indicate particular elements below) or said claims Nos. are so unclear that no meaningful opinion could be formed (specify):
		the claims, or said claims Nos. are so inadequately supported by the description that no meaningful opinion could be formed (specify)
	X	no international search report has been established for said claim Nos. 29
		A meaningful opinion could not be formed without the sequence listing; the applicant did not, within the prescribed time limit:
		Furnish a sequence listing on paper complying with the standard provided for in Annex C of the Administrative Instructions, and such listing was not available to the International Preliminary Examining Authority in a form and manner acceptable to it.
		Furnish a sequence listing in electronic form complying with the standard provided for in Annex C of the Administrative Instructions, and such listing was not available to the International Preliminary Examining Authority in a form and manner acceptable to it.
		Pay the required late furnishing fee for the furnishing of a sequence listing in response to an invitation under Rules 13ter.1(a) or (b) and 13ter.2.
		A meaningful opinion could not be formed without the tables related to the sequence listings; the applicant did not, within the prescribed time limit, furnish such tables in electronic form complying with the technical requirements provided for in Annex C-bis of the Administrative Instructions, and such tables were not available to the International Preliminary Examining Authority in a form and manner acceptable to it
		the tables related to the nucleotide and/or amino acid sequence listing, if in electronic form only, do not comply with the technical requirements provided for in Annex C-bis of the Administrative Instructions.
	-[See Supplemental Box for further details.

"INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY

International application No.

PCT/AU2005/000422

Box	No.	IV Lack of unity of invention
1.		In response to the invitation to restrict or pay additional fees the applicant has, within the applicable time limit:
		restricted the claims
		paid additional fees
		paid additional fees under protest and, where applicable, the protest fee
		paid additional fees under protest but the applicable protest fee was not paid
		neither restricted the claims nor paid additional fees
2.		This Authority found that the requirement of unity of invention is not complied with and chose, according to Rule 68.1, not to invite the applicant to restrict or pay additional fees.
3.	This .	Authority considers that the requirement of unity of invention in accordance with Rules 13.1, 13.2 and 13.3 is:
		complied with.
	X	not complied with for the following reasons:
		The international application does not comply with the requirements of unity of invention because it does not relate to one invention or to a group of inventions so linked as to form a single general inventive concept. In coming to this conclusion the International Searching Authority has found that there are different inventions as follows:
		1. Claims 1 to 28 directed to a phacoemulsification needle comprising a rod surrounded by a hollow tube member. It is considered that this arrangement comprises a first "special technical feature".
•		2. Claims 29 directed to an irrigation cannula or chopper comprising a hollow tube thereabout, with the tube having a flexible mid portion. It is considered that the flexible mid portion comprises a second special technical feature.
		Since the abovementioned groups of claims do not share any of the technical features identified, a "technical relationship" between the inventions, as defined in PCT rule 13.2 does not exist. Accordingly the international application does not relate to one invention or to a single inventive concept, a priori.
4. C	Conse	quently, this report has been established in respect of the following parts of the international application:
		all parts.
		\overline{X} the parts relating to claims Nos. $1-28$
		

INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY

International application No.

PCT/AU2005/000422

Box No. V	Reasoned statement un citations and explanati	nder Article 35(2) with regard to notions supporting such statement	velty, inventive step or industrial applicability;
1. Statement			
No	velty (N)	Claims $1-28$	YES
		Claims	NO
Inve	entive step (IS)	Claims $1-28$	YES
		Claims	NO
Ind	ustrial applicability (IA)	Claims $1-28$	YES
		Claims	NO

2. Citations and explanations (Rule 70.7)

Claims 1 - 28:

Claims 1 to 28 meet the requirements of PCT Articles 33(2) - (4). None of the prior art documents, or obvious combination thereof, disclose a phacoemulsification needle comprising a rod to transmit ultrasonic energy and tube member surrounding the rod, wherein the tube member is arranged for aspiration of emulsified ocular material. In the prior art documents aspiration occurs via the rod transmitting the ultrasonic energy. Therefore the claims are novel and inventive. The claims also have industrial applicability.
